PUBLIC HEALTH NURSE

DISTINGUISHING FEATURES OF THE CLASS: The work involves responsibility for planning, providing, directing, and evaluating nursing care in a variety of settings with the goal of improved health outcomes. The work involves planning, development, provision, and evaluation of public health programs designed to prevent disease and improve the health of individuals, families, specific populations, high risk groups, and/or communities. The work requires the application of biological, physical, and psycho-social sciences and nursing skills in the care of the sick, the prevention of disease, and the conservation of health to individuals, families, and communities. The work requires specialized judgment, skill, and complex activities with minimum supervision. The work is performed under the general supervision of a Supervising Public Health Nurse or supervisor as designated by the Department Head and routine day-to-day tasks may be overseen by a Public Health Nurse II. A Public Health Nurse may supervise Registered Professional Nurses, Licensed Professional Nurses, unlicensed personnel, and staff assigned to carry out plans of care. The incumbent does related work as required.

TYPICAL WORK ACTIVITIES: (Illustrative only)

Assesses, evaluates, and modifies individualized patient nursing care plans that incorporate comprehensive physical assessments, subjective and objective clinical patient and environmental data, and current best practice;

Provides skilled nursing care and prescribed treatments to patients in their homes, clinics, schools, and other community settings, and demonstrates nursing care to patients and families;

Provides health teaching and counseling appropriate to the client/family;

Performs initial assessments on patients and/or families being considered for admission to nursing services and develops a plan of care;

Maintains client records showing systematic assessment, planning, intervention, and evaluation in accordance with agency requirements and professional nursing standards;

May lead a team of peers and subordinates providing nursing care and evaluates the effectiveness of team activities;

May provide for the continuity of patient care by promoting referral of hospital and clinic patients to appropriate community agencies;

Coordinates/collaborates with other members of the health care delivery team to determine best level of care along the health care continuum, uses community resources, discharge planning, and case management to maximize patient outcomes;

Counsels and guides individuals and families towards self-help in recognition and solution of physical, emotional, and environmental health problems, and provides health education and training in the prevention of illness and the attainment of maximum health;

Conducts epidemiological surveillance, investigation, case finding, and screening;

Addresses groups regarding multiple public health topics using a variety of teaching/media techniques;

Participates in conducting surveys and studies related to health matters, and monitors performance indicators for effectiveness of programs;

Compiles and uses records, reports and statistical information for evaluation and planning of the assigned programs.
