MENTAL HEALTH CLINICIAN II

DISTINGUISHING FEATURES OF THE CLASS: This position involves independent responsibility for the performance of psychotherapy in helping clients with social, emotional, and related behavioral health needs. The work is performed with a high degree of clinical independence and judgment along with routine clinical supervision in the conduct of assessment, diagnosis, and treatment. Consultation and education activities may be provided to the staff members of the mental health clinic and personnel of other agencies. The Mental Health Clinician II functions under general direction from senior staff, with considerable leeway allowed for the exercise of independent judgment in the performance of clinical duties. Employees in this class are expected to collaborate and cooperate as needed with professionals of various agencies in order to affect better client care. Supervision may be exercised over LMHC interns. The incumbent does related work as required.

TYPICAL WORK ACTIVITIES: (Illustrative only)

Performs the intake and screening of new clients, evaluating, and diagnosing which includes assessing strengths, needs, abilities, and preferences.;

Develops, in conjunction with the client, strength based treatment plans;
